GAURAV KUMAR

React.js Developer | JavaScript, HTML5 & CSS3 | RESTful API Integration
Noida, Uttar Pradesh | gaurav.sof.05@gmail.com | 9031522196 | LinkedIn | GitHub | Portfolio

SUMMARY

Frontend Developer with 6.5+ years of experience building responsive, user-friendly web applications using React.js and JavaScript (ES6+), with a strong focus on usability, performance, and reliability. Currently building and running FastLoan, an independent loan-lending Android app, single-handedly owning its planning, React Native (Expo) development, Node.js/Express and MongoDB backend, testing, and deployment on AWS EC2. Experienced collaborating with designers, backend developers, and QA teams to translate business and technical requirements into effective frontend solutions, writing clean, scalable, and maintainable code. Approaches troubleshooting and debugging with a structured, detail-oriented mindset, integrating RESTful APIs into frontend components and contributing to Agile ceremonies including sprint planning, daily stand-ups, and retrospectives. Strong written and verbal English communication skills, with the ability to work independently while contributing effectively within a cross-functional team, committed to delivering high-quality software and continuously learning emerging frontend technologies.

CORE SKILLS

Languages & Frontend: JavaScript (ES6+), React.js, Redux, Redux Toolkit, Context API, HTML5, CSS3, Responsive Web Design, Component-Based Architecture

Mobile & Backend: React Native (Expo), Node.js, Express.js, MongoDB

API Integration: RESTful API Integration, Postman, Swagger (API Documentation)

Cloud & Deployment: AWS EC2, Custom Domain Setup, Android APK Builds

Testing & Quality: Unit Testing, Functional & Regression Testing, Debugging & Troubleshooting, Code Reviews

Version Control & Tools: Git/GitHub, Jira, Azure DevOps (CI/CD)

Process & Documentation: Agile/Scrum (Sprint Planning, Daily Stand-ups, Retrospectives), SDLC, Requirement Analysis, Technical Documentation

Collaboration: Cross-Functional Collaboration (Design, Backend, QA), Strong Written & Verbal English Communication

EXPERIENCE

Software Engineer — FastLoan (Solo Project) Jun 2025 – Present
FastLoan | Independent Product

- Single-handedly built FastLoan, a loan-lending Android application, owning the complete lifecycle — planning, development, testing, deployment, and maintenance.
- Planned product scope, user flows, and system architecture for two separate experiences: a customer app and an admin side.
- Developed the mobile frontend in React Native (Expo), building reusable, responsive components for customer and admin workflows.
- Designed and built the backend with Node.js, Express.js, and MongoDB, creating RESTful APIs and data models to power the app.
- Tested the application end to end, validating APIs with Postman and performing functional and regression testing on Android devices.
- Deployed and hosted the backend on AWS EC2, configured a custom domain for the API, and distributed the app to users via APK builds.
- Managed source code with Git/GitHub and independently handled bug fixes, enhancements, and releases.

Application Developer — Frontend (React.js) Apr 2022 – May 2025
TELUS Digital

- Developed and maintained responsive, user-friendly React.js applications with a focus on usability, performance, and reliability.
- Collaborated with designers, backend developers, and QA teams to translate business and technical requirements into effective frontend solutions.
- Wrote clean, scalable, and maintainable code, following established development standards and best practices.
- Participated in code reviews, providing and incorporating constructive feedback to continuously improve code quality.
- Troubleshot, debugged, and resolved application issues across different browsers and environments to maintain a seamless user experience.
- Integrated RESTful APIs into frontend components, validating responses using Postman and Swagger documentation.
- Contributed to Agile ceremonies, including sprint planning, daily stand-ups, and retrospectives.
- Engaged with stakeholders and business teams to gather feedback and identify opportunities for product and workflow enhancements.
- Supported software testing by contributing to unit tests and collaborating with QA teams to validate functionality before deployment.

- Maintained technical documentation covering processes, guidelines, and application components.

Software Developer Associate — JavaScript / Frontend Development Apr 2020 – Mar 2022
Talent Mine India

- Built responsive, cross-browser user interfaces using JavaScript (ES6+), React.js, HTML5, and CSS3, with a focus on usability and reliability.
- Collaborated with backend developers and QA teams to integrate RESTful APIs into frontend components.
- Troubleshot and resolved UI issues across browsers and devices to maintain a consistent user experience.
- Contributed to Agile ceremonies and sprint activities, including planning, stand-ups, and retrospectives.
- Logged and tracked defects, collaborating closely with developers to drive timely resolution.

PROJECTS

Aurora Stream — Real-Time Messaging Platform (Frontend)
React.js, Redux, WebSocket/Socket.IO (Client Integration), REST APIs

- Built the frontend for a real-time team messaging platform supporting one-to-one and group messaging with live notifications, typing indicators, and presence.
- Consumed RESTful APIs (Postman), integrating and validating payloads and status codes within the React.js UI.
- Troubleshot and resolved UI defects through Functional, Integration, Smoke, and Regression testing.
- Built responsive, component-based UI elements in React.js to support real-time updates and consistent performance across devices.
- Contributed to code reviews and used AI-assisted tools (ChatGPT, GitHub Copilot) for test case generation and documentation.

Ember Flow — Workflow Automation Modules (Frontend)
React.js, JavaScript (ES6+), Redux, REST APIs

- Developed frontend workflow automation modules translating business requirements into functional UI workflows.
- Designed reusable React.js components to streamline UI development across multiple workflow modules.
- Built and executed UI test scenarios across Functional, Integration, Smoke, Sanity, and Regression testing; validated REST API responses and data rendering.
- Collaborated with QA and Business teams during sprint execution to refine workflow requirements and resolve defects.
- Tracked defects via Jira and supported UAT and post-deployment verification for stable releases.

Willow Snow — Internal Ticketing & Communication Platform (Frontend)
React.js, JavaScript (ES6+), Redux, REST APIs

- Developed the frontend for an internal ticketing and communication platform using React.js.
- Integrated REST APIs to support core platform features, handling data fetching and state updates in the UI.
- Built reusable, responsive UI components in React.js to support ticketing workflows and real-time updates.
- Performed functional validation of communication modules to ensure reliable message delivery on the frontend.
- Supported sprint-based releases in an Agile environment, participating in defect analysis and UI issue resolution.

Casa Spring — Enterprise Application Modules (Frontend)
React.js, JavaScript (ES6+), REST APIs

- Built enterprise application UI modules using React.js.
- Consumed and integrated REST APIs into the frontend, validating request and response handling with Postman.
- Verified JSON response payloads for data accuracy and correct rendering across UI components.
- Performed Functional, Integration, and Regression testing to ensure release quality.
- Collaborated with QA and Business teams during sprint execution, investigating and resolving UI defects.

EDUCATION

B.Tech, Computer Science & Engineering
Dr. A.P.J. Abdul Kalam Technical University | 2016 – 2020

Intermediate (12th)
Sant Kabir College, Samastipur | 2014 – 2016

High School (10th)
Public School Bela, Darbhanga | 2012 – 2013
